

Prachi Mittal.

Product Designer | Agentic AI & Enterprise SaaS UX | 3+ YOE

+91 8959202673 · prachimittaldesign@gmail.com · Hyderabad, India · www.mittal.design · linkedin.com/in/prachi15mittal

summary

Product Designer specializing in agentic AI and enterprise SaaS — I design the interfaces where humans and AI agents work together. In 3+ years I've grown from shipping a 12-app smart-TV ecosystem at CES 2024 to owning enterprise platforms end-to-end: sole designer on SnapLogic's documentation system (40% fewer clicks-to-target) and designer of Ved, an AI-native CMS with conversational Prompt-as-a-Service UX. With an architect's systems thinking, I turn ambiguous, zero-to-one problems into governed, scalable product experiences — now seeking a senior role to own the next one.

experience

Mobius by Gaian, Product Designer

Aug 2025 – Present | Hyderabad

- **Cut clicks-to-target by 40%** on SnapLogic's enterprise documentation portal via a dual-navigation IA (product-based + task-based); sole designer owning UX strategy, responsive design, and brand guidelines, validated via Playwright usability testing.
- **Owned the SnapLogic Snap Pack module end-to-end** — advanced search, DocGPT conversational search, tables/feedback, APIM v2 — via weekly client scrums with international stakeholders.
- **Designed Ved, an AI-assisted CMS + DITA Builder** with Prompt-as-a-Service conversational UX, DITA versioning, DRM/compliance, and roles & privileges; used Claude, GPT-4o, and Figma Make to accelerate explorations and secure CEO-level approval; led v1 release handoffs.
- **Designed agentic platform experiences across the Mobius DTaaS suite** — Unified Canvas, SAI model catalog (register/deploy/query flows), and KYA knowledge-graph UX — and co-built Component Library 2.0, a Flowbite-aligned design system with agentic AI patterns adopted across all product lines.

Mobius by Gaian, Associate UX Designer

Nov 2023 – Jul 2025 | Hyderabad

- **Designed Reeve and Mo end-to-end** — two smart-TV apps in the 12-app MIAs ecosystem soft-launched at CES 2024 — with cross-app continuity, adaptive streaming with personalized programmatic ads, QA handoff, and CEO/Head of Design reviews.
- **Designed the Profile & Gamification layer** unifying UX across all 12 MIA apps; contributed UI across Clink, Amplyfund, Vote IQ, Impressio, and iZak.
- **Helped win and grow the SnapLogic account** — redesigned 6 SnapLogic Academy LMS course pages, delivered documentation UI for web/tablet/mobile, and curated a 60+ illustration style guide through weekly client reviews.
- **Designed core CMS flows** (Media Library, DITA Builder); contributed to design systems on atomic structure, Ant Design, and Flowbite; mentored 5+ designers and interns.

Circle Health, Product Design Intern

Jan 2023 – Jun 2023 | Bengaluru

- **Led design of 3 major features (+20% user engagement)**; designed an HR Dashboard from concept to Play Store release — research, IA, wireframes, UI/UX, and dev handoff.
- **Revamped the B2B2C health-tracking app** — improved information density and task discoverability; 20% lift in user satisfaction post-launch.

Samsung, UX Researcher, MITID Live Project

Aug 2022 – Dec 2022 | Pune

- Co-developed emotional-design frameworks for a live Samsung brief with the Bengaluru R&D team, iterating against usability findings.

Lumiere Business Solutions, Design Intern × MITID Consultant

Jun 2022 – Jul 2022 | Mumbai

- Ran moderated consumer research and usability testing; produced pitch decks and competitive research artefacts for client studies.

education

Masters in Design Management · MIT Institute of Design, Pune — Third Rank Holder

2021 – 2023

B.Arch (Bachelor of Architecture) · School of Architecture, IPS Academy, Indore

2015 – 2020

skills

Design — Product Design, UX/UI Design, Interaction Design, Visual Design, Wireframing, Prototyping, Information Architecture, Design Systems, Responsive Design, Design Handoff, Mentoring, SaaS, Enterprise, Agile

AI & Agentic UX — Agentic AI Patterns, Conversational UX, Prompt Engineering, Prompt-as-a-Service, AI-Assisted Workflows, LLM Product Design, Human-AI Interaction

Research — User Research, User Interviews, Competitive Analysis, Heuristic Evaluation, Usability Testing, Journey Mapping, Jobs-To-Be-Done, Card Sorting, Personas

Tools — Figma, Figma Make, Framer, Cursor, Claude, ChatGPT, Bolt, Lovable, Photoshop, Illustrator, After Effects, Jira, Confluence, Miro, Playwright

Languages — English (Fluent), Hindi (Native)

Certifications — Google UX Design (Google) · Generative AI for UI/UX Design (IBM) · Prompt Engineering for AI (Udemy)
