

UX Audit

In this section we'll walk through the proposed design by Snaplogic design team, for Snap Documentation. Feedback is marked on the screenshots for analyzing Good to have's and Not to have.

- 1
- Add a persistent, type-ahead search at the top; can include filters for doc versions.

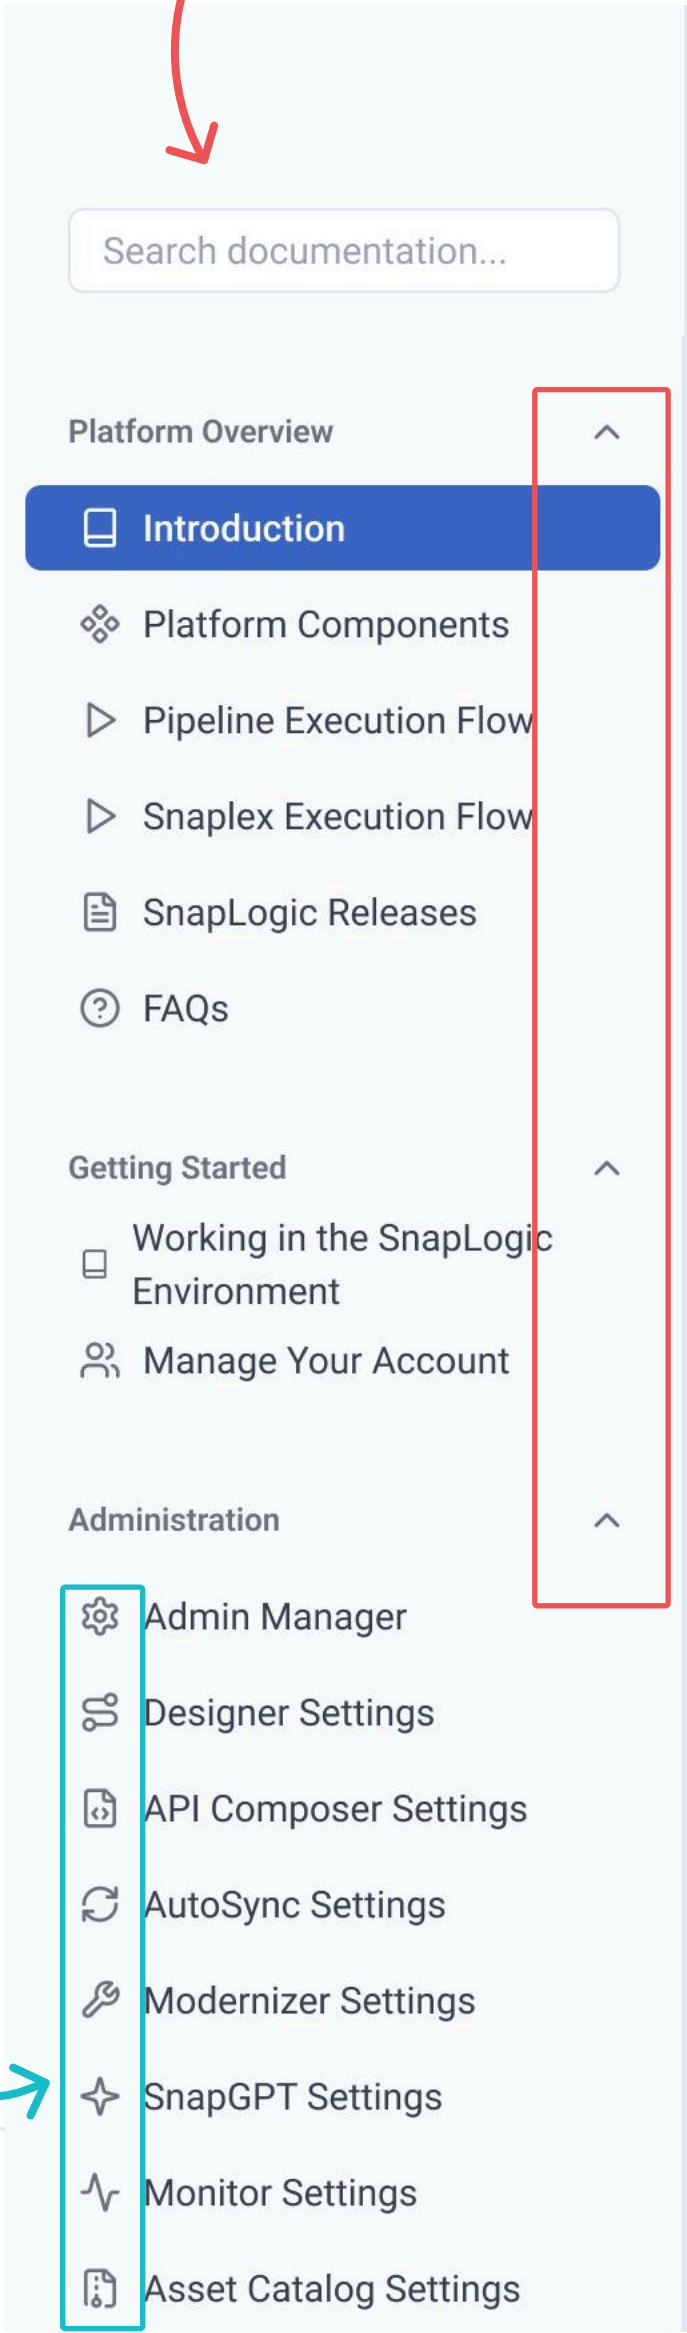

- 2
- Collapsible, multi-level sidebar organized by modules. With appropriate spacing and icons

Side Navigation Panel

- 1
- No search required in the right panel for our documentation as we have prominent top-bar search

- 2
- Chevrons function better when placed on left side in a tree structure as we have:

TITLE
Heading
Sub-headings

- 3
- Iconography with consistent icons can be used for main headings in Blue instead of icons on each heading in our case

TITLE
Heading
Sub-headings
